Start-up Process

Step 1: Turn the DISPLAY ON
Press the DISPLAY ON button to turn on the projector or display in the room.

Step 2: Check Confidence Monitor
The confidence monitor's status is indicated by the status light. If the light is off, press the power button. If green, move to the next step.

STEP 3: PICK YOUR SOURCE
Decide which source you want to be displayed on the large display and the confidence monitor.

Sources Explained: PC
The power indicator for the computer is in the front. If the light is white, the power is on. If there is no light, power on the computer by using the power button.

Sources Explained: DVD
To play a DVD, Blu-Ray or CD:
1: Press the Power Button on the upperleft
2: Press TRAY OPEN
3: Insert the disc and close the tray
3: Press Play or press "Menus page" to access the advanced navigation options.

Please call the Helpdesk at 717-871-2371 to request assistance.
Sources Explained: Laptop 1
If you wish to display the output of your computer using HDMI, use the Laptop 1 source option.

Sources Explained: Laptop 2
If you wish to display the output of your laptop using VGA, use the Laptop 2 source option.

Sources Explained: Doc Cam
After selecting the Doc Cam as a source, the device must be powered on using a switch on the Doc Cam itself.

FAQ

Q: How do I play a DVD? How do I play a Blu-Ray?
A: Pressing the "play" button will not always play the media. In some cases you must use the "cursor" keys (accessed by pressing the "Menus Page" button) to select "play movie" and then press "enter" on the Extron touch screen.

Q: Where do I put my USB drive?
A: There is a USB cable located in the cable cubby with the guest laptop cables.

Q: What is HDMI?
A: A HDMI port looks similar to this: (colors may vary)

Q: How do I get the time played for a DVD?
A: Pressing the "Menu" button and then "INFO" button while playing a DVD/Blu-Ray will bring up the time played. You can fast forward and rewind with the time stamp up.

Q: How do I connect a MAC laptop?
A: You might have to use additional hardware to convert your MAC's output to VGA or HDMI.

Q: What is VGA?
A: A VGA port looks similar to this: (colors may vary)
