Technology Guide | Quick – Start
Roddey Room 136

Start-Up Process:
Step 1.

Touch the panel anywhere to wake the Extron system up. You may have to wait up to 10 seconds. Once screen is up, select On in the Main Display block (bottom left corner)

After selecting the on button this will flash on your display

Please be patient. It may take up to a minute for your displays to warm up. When the displays are on you will also see the on button turn green
Note, Default view – is when all displays are on and displaying the one source that is selected

Step 2

Select view in column on right

After selecting the display button, you will be prompted to select the source

Step 3

Select a source. we used DVD for this example
If the source you selected is not powered on you will get a warning to turn on device then close warning

Once closed for the (DVD option only), you will then get the DVD menu options. When DVD is operating you can either close the page or if you want the menu bar again select DVD from the display and repeat steps

If you have been using all the monitors and want to get back to the default view (all monitors extended view) please repeat steps 2 and 3
Step 4

Turning off all the monitors. Select Off in the Main Display block (bottom left corner)

Select yes

Your displays are now turning off

Please remember to log off the computer. Also, disconnect your connected devices and bring them with you. If any issues arise please contact the Help Desk Classroom support number @ 717-871-7280.
