implementing a solution for our prospective transfer students. It has made changes to our SPAM filters to increase the sensitivity. This could result in more messages being quarantined. Please remember to check your quarantines and just email folder regularly to ensure you are not missing any important messages.

All users will also need to change their passwords prior to the end of the month. You can change your password either by going through the logins page and clicking ‘Forgot Password’ or by going to https://myaccount.millersville.edu and clicking ‘My Account’ @ MU and clicking ‘Change Password’.

Mobile phishing lures are the most common; DocuSign lures are the most effective. In an effort to prevent future attacks, some shorter security awareness training modules on specific phishing lures are being delivered via email. Please remember to check your quarantine and answer session over the lunch hour.

Banner 8
Banner 8 will be decommissioned October 31, so make sure you are transitioning your staff and workload to Banner 9.

January 2019 SPAM
