[Millersville University Review]

QUOTE

"So much of who I have become personally and professionally is due to my time at Millersville. As captain of the ice hockey team, I really learned how to be a leader and made some great friends that I still keep in touch with today. Professionally, the MU meteorology department laid the foundation of knowledge and research skills that helped me land a job at NASA."

- Dr. John Yorks | Sciences and Exploration Directorate - NASA
