**Changes with New Telephone System**

**Using 8 to dial an outside line** – With the new telephone system, the University now dials an 8 to get an outside line instead of 7. This change was made to help reduce the number of accidental 911 calls.

**Street Address when calling 911** – When calling 911, county dispatch will see the street address of the person making the call. But due to the size of our buildings, people will need to describe their location within the building.

**Utilizing only the 871 extension** – To minimize confusion on the 871 or 872 extension and reduce the number of phone numbers assigned to MU, we have reassigned all 872-XXXX and 871-2XXX to 871-4XXX, 871-5XXX and 871-7XXX numbers.

**10-digit dialing off campus** – When making an off-campus telephone call, you will need to dial the entire number including the area code. Lancaster County is one of the last counties in PA to make this switch.

**Phones capabilities per person** - Phones will be assigned to conference rooms and individuals rather than a location. Now that cell phones are so popular and provide mobility to all locations, we are focusing on providing individuals with telephones rather than all locations. Therefore, we will be removing telephones from computer labs, classrooms, break rooms, etc.
