Setting up myVille Mail on Gmail

The instructions below are for Gmail specifically. The essential information (Server address, SMTP address, etc.) can be used for other email services (Yahoo, Microsoft, etc.).

Configuring Gmail to access your myVILLE Mail account with POP3
1. Go into Settings
2. Click on Accounts and Import
3. Scroll down to Check mail from other accounts (using POP3)
4. Click Add a POP3 mail account you own
5. Enter your myVILLE Mail address and click on Next Step

Add a mail account you own

Enter the email address of the account to get mail from
(Note: You may add 4 more of your accounts)

Email address: username@millersville.edu

[Add a mail account you own interface]

6. Configure POP3 settings

Add a mail account you own

Enter the mail settings for username@millersville.edu. Learn more

Email address: username@millersville.edu
Username: username
Password: *********
POP Server: mail.millersville.edu Port: 995

- Leave a copy of retrieved message on the server. Learn more
- Always use a secure connection (SSL) when retrieving mail. Learn more
- Label incoming messages:
- Archive incoming messages (Skip the Inbox)

[Add a mail account you own interface]

These are the required or recommended settings:
- POP Server: mail.millersville.edu (required)
- Port: 995 (required)
- Uncheck Leave a copy of retrieved message on the server (recommended)
  - NOTE: If “Leave a copy of retrieved message on the server” is unchecked, Gmail will delete the message from the server once it has been retrieved. The only place the retrieved email will be available will be Gmail. If the option is checked, Gmail will NOT delete the email from the server and you will need to remember to delete retrieved messages from your myVILLE Mail inbox to avoid going over quota.
- Check Always use a secure connection (SSL) when retrieving email (required)
7. Click on **Add Account**

8. Configure the ability to send email as your myVILLE Mail email address. This is optional and can also be configured at a later time under the **Send mail as** section of the **Accounts and Import** settings.

---

**Your mail account has been added.**

You can now retrieve mail from this account. Would you also like to be able to send mail as username@millersville.edu?

- Yes, I want to be able to send mail as username@millersville.edu.
- No (you can change this later)

Next Step »

---

**Add another email address you own**

Enter information about your other email address. (your name and email address will be shown on mail you send)

Name: Your name here
Email address: username@millersville.edu

- Treat as an alias. Learn more
  - Specify a different "reply-to" address (optional)

Cancel  Next Step »

---

You may also choose to use a different reply-to email address if you desire.

---

**Add another email address you own**

**Send mail through your SMTP server?**

When you send mail as username@millersville.edu, the mail can either be sent through Gmail or through millersville.edu SMTP servers.

- Send through Gmail (easier to set up)
- Send through millersville.edu SMTP servers Learn more

SMTP Server: mail.millersville.edu  Port: 587
Username: username
Password: **********

- Secured connection using TLS (recommended)
- Secured connection using SSL

Cancel  Back  Add Account »
These are the required or recommended settings:

- SMTP Server: Change from smtp.millersville.edu to mail.millersville.edu (required)
- Port: 587 (required)
- Select Secured connection using TLS (required)

9. Click Add Account

10. Check your myVILLE Mail inbox for the confirmation code to confirm your email address and complete the process.
