Setting up an iView 3500STBII

Setting up an iView 3500STBII at Millersville University

What you will need:
- An iView 3500STBII. This can be purchased from Amazon.
- 2 AA batteries for the iView remote.
- An HDMI cable.
- A coax cable.

What you need to do:

1. Plug a coax cable into the ANT-IN on the back of the iView and plug the other end into the cable TV wall jack.
2. Plug an HDMI cable into the HDMI OUT port on the back of the iView and plug the other end into an HDMI port on the TV. Take note of which port on the TV you plugged it in to.
3. Turn on the TV and change the source to the HDMI port you plugged the HDMI cable in to.
4. Plug the iView into an electrical outlet. Shortly after plugging the iView in you will see a menu.
5. Using the iView remote set the Language and Country settings.
6. Select Exit. Do not perform the channel search from this menu.
7. From the next menu use the right arrow button to bring up the Channel Search menu.
8. Change the Signal Type to Cable.
9. Select Auto Search. The iView will now search for channels. This will take approximately 10 minutes.
10. The setup is now complete.
