Disabling Remote Desktop

In some cases, you may wish to disable remote desktop for security or other reasons. Here are the instructions for doing so:

1. Click on **Start**.
2. Click on **Control Panel**.
3. Click on the **System** icon.
   - **Windows 7 Users** -- Click on the **Advanced System Settings** link on the left hand side panel.
4. You should now see the “System Properties” window pop open. Please click on the **Remote** tab.
5. Under the “Remote Desktop” section make sure...
   - **Windows 7 Users** – Make sure the “Don’t allow connections to this computer” is selected.

1. Click on **OK**.
2. You are done.
