Mobile devices

Can I use a smartphone, tablet, or other mobile device?

In many cases, yes, and you do not need a special D2L app. D2L is designed to work well in web browsers on tablet and mobile devices. That said, some materials and resources within courses may work better, or only, on desktop or laptop computers. Additionally, for time- and grade-critical activities, like taking quizzes, we recommend you use a supported desktop web browser and a reliable Internet connection.

Mobile and Tablet Web Browsers Supported by D2L
