Before running the i>clicker program, it is important to establish the internet browser you regularly use for D2L as your system default. This is important as it will ensure the i>clicker software is properly integrated with D2L.

What is a "Default Browser"?

- **Default**: A preselected option. Which program automatically opens a file type.
- **Browser**: Any program that you use to browse the web - FireFox, Chrome, Internet Explorer.
- **Default Browser**: The internet browser on your computer set to automatically open websites.

How to Set your Default Browser:

1. Open the Safari Internet browser, if you do not know where it is located on your computer, search for it in spotlight, located in the top right-hand corner of your desktop

2. Once you have Safari open, click “Safari”, as shown below in the red box below

3. On the drop down menu. Click "Preferences", as shown selected in the blue box

4. In the "General" tab, the first option on this menu should read "Default web browser" – select the browser you would like to make your default
You have now set your default browser.
