Publishing a Page

In order for the changes to be viewable to the public, any modifications to a page must be published.

To publish a page,

1. View the page you want to publish.
2. Click on the Publish link, located above the page preview (see screenshot).
3. Click the Submit button in the upper right-hand corner of the dialog.

More information about publishing pages

- Publishing jobs are placed within a queue that is shared by other users within Cascade. The time for your changes to take effect on your published website depends on how many jobs are scheduled before you.
