How to Get a Test Graded - Portrait

Tell me

1. Compile the test batch (Put your key sheet on top followed by the student test forms)
2. Scan the compiled test batch
   a. **Scan using only Ricoh copiers**
   b. Ensure that the scan settings match those noted below
      i. The Scan settings are usually located on the left-hand side of the printer screen (*NOTE: different Ricoh models may have a slightly different looking screen*). The below imagine is a sample of what this screen may look like

   ![Ricoh Printer Scan Settings](image_url)

   ii. If scanning 50 question tests, no changes need to be made to the scanner settings. Simply put the forms in the scanner and hit scan.
   iii. If scanning 100 or 200 question tests:
      1. Place forms in tray.
      2. Click on **Original Feed Type** to get the scan settings menu
      3. If you have any questions as to where to locate the scan settings please contact the Help Desk and we can assist you with locating and selecting the correct settings for your Ricoh model

   If **Original Feed Type** is selected, you should see a screen similar to that below that will allow you to specify the scan settings
   i. Confirm the following scan settings are selected:
      1. Original Orientation is set to **Original Orientation** (Default)
      2. 2-sided should be selected if using the 100 or 200 question answer sheets
      3. Page Opening Orientation is set to **Top to Top** (Default)
      4. **Note:** Below is an example of the settings needed on Ricoh Printers. **The correct settings are highlighted in yellow.** Your model may differ from these images.
1. Please check your scanned test batch and make sure that it has been scanned in portrait orientation. Please see the sample below

   a. **NOTE:** If your scanned test batch PDF is not in portrait orientation, our program can still grade the test using the old method. Processing will take slightly longer though.

2. Submit the scanned test batch using the Sysaid self-service portal

   a. The portal can be accessed by going to [https://millersvilleuniversity.sysaidit.com/servicePortal/](https://millersvilleuniversity.sysaidit.com/servicePortal/)

   b. Click on the Test Scoring icon

   i. Complete all the fields on the submission form

   ii. Attach the scanned test batch at the bottom of the submission form

3. The Help Desk will score the test batch and e-mail the results back through Sysaid

   a. Test results will be sent as an Excel document

   i. The test results contain 11 different reports

   ii. Results can be printed or downloaded to your computer
