Assignments dates and Turnitin

How do the dates I set for an assignments folder in D2L work with dates in Turnitin?

If you set assignment folder dates in the “Restrictions” tab when you create the folder, those dates will be copied to Turnitin when you enable Turnitin on the “Turnitin®” tab.

If you do not set dates in the “Restrictions” tab before enabling Turnitin on the “Turnitin®” tab, Turnitin will use these default dates:

- start date: the day before you enabled Turnitin
- due date: the day you enabled Turnitin + 7 days
- end date: the day you enabled Turnitin + six months
