Allowing all participants to screen share

As the meeting host, I can share my screen, but I want my participants to share their screens too. How do I allow participants to screen share?

While in a meeting:

1. Click the up arrow (^) next to Share Screen.
2. In the menu that opens, click Advanced Sharing Options...
3. In the Advanced Sharing Options... window that opens:
   a. Under Who can share? choose All Participants.
   b. Close the window.

⚠️ Zoom restricts screen sharing to hosts only by default to help protect your meetings from Zoombombing.
