Jabber Installation for IOS devices

**Note:** In order to enable all of Jabber’s features, you must contact the Help Desk and request Jabber be enabled on your account. This should be done before installing Jabber.

1. In your App store on your IOS device search for Cisco Jabber and tap on Install. You may be asked for your Apple ID before installing, have it ready just in case.

2. After installing, tap on Open.

3. When these messages appear depending on your preferences either select Don’t Allow or OK.
4. Read the notices and license terms and tap Accept.

5. A message displays asking you to let Jabber access the microphone. Tap OK.

6. At the login screen enter your first initial and last name @millersville.edu and tap on Continue. Example: If your name is Sam Jones you would enter sjones@millersville.edu
7. Enter your Millersville University password and tap on SIGN IN.

8. Jabber is now installed and ready to use.
