Grade assignment submissions

How do I view and leave feedback on student submissions to assignment folders?

These instructions assume you have already logged in to D2L and entered the course in which you wish to work.

First go to the assignments tool.

(optional / recommended) associate your course discussions, quizzes and assignments to grade items. You may enter scores and feedback for an activity associated to grades, at the activity location rather than at the Grades tool. Those scores will then be visible at the associated Grade item.

(optional) attach a rubric to an assignment
