Create quizzes or exams in D2L

How do I create a quiz or exam to assess students in D2L?

⚠️ These instructions assume you have already logged in to D2L and entered the course in which you wish to work.

First go to the Quizzes tool.

(optional/recommended) Create questions in the Question Library before you create a quiz, survey or self assessment. If you want to use random question pools on a quiz you must create questions in the Question library first.

Add Questions to Question Library

Create a New Quiz

(optional / recommended) associate your course discussions, quizzes and assignments to grade items. You may enter scores and feedback for an activity associated to grades, at the activity location rather than at the Grades tool. Those scores will then be visible at the associated Grade item.
