Zoom Cloud Recordings to MU Video

Zoom Recordings and MU Video

Zoom automatically transfers new cloud recordings to MU Video. The creator (host) of the Zoom meeting or webinar becomes the owner of the new entry in MU Video, and the MU Video entry is automatically made private, accessible only by the owner. These recordings remain in MU Video even after Zoom cloud recordings are deleted 90 days after being created.

Want to manually transfer Zoom recordings to MU Video? Please see: Downloading Zoom Recordings to Upload into MU Video
