Locate and Review MU Video Media Analytics

Using the KMS analytics display, media owners can see how viewers have engaged with video media, including in depth analysis of how individual users watched, skipped or rewatched segments of a video.

Please note: in order for MU Video to record the names of individual students engaging with media embedded in a D2L course, the media must be inserted in D2L using the correct embed option. See Embedding Media from MU Video in Content for instructors.

These directions presume that you have successfully logged into your MU Video account.

See Entry Level Analytics at knowledge.kaltura.com
